

**FACULTY OF
PAEDIATRICS**

ROYAL COLLEGE OF
PHYSICIANS OF IRELAND

INTERNATIONAL CLINICAL FELLOWSHIP TRAINING IN

PAEDIATRIC EMERGENCY MEDICINE

This curriculum of training in ICFP Paediatric Emergency Medicine was developed in 2015 and undergoes an annual review by Dr Rasha Sawaya, Paediatric Emergency Consultant and the RCPI Education Department. The curriculum is approved by the Faculty of Paediatrics.

THE HST TAUGHT PROGRAMME BY QUARTER – YEAR 1.....	5

Introduction

The International Clinical Fellowship Programme (ICFP) provides a route for overseas doctors wishing to undergo structured and advanced postgraduate medical training in Ireland. The ICFP enables suitably qualified overseas postgraduate medical trainees to undertake a fixed period of active training in clinical services in Ireland.

The purpose of the ICFP is to enable overseas trainees to gain access to structured training and in active clinical environments that they cannot get in their own country, with a view to enhancing and improving the individual's medical training and learning and, in the medium to long term, the health services in their own countries.

This Programme will allow participants to access a structured period of training and experience as developed by the Royal College of Physicians of Ireland to specifically meet the clinical needs of participants as defined by their home country's health service.

Aims

Upon satisfactory completion of the ICFP, the doctor will be **competent** to undertake comprehensive medical practice in their chosen specialty in a **professional** manner, in keeping with the needs of the healthcare system.

Competencies, at a level consistent with practice in the specialty, will include the following:

- Patient care that is appropriate, effective and compassionate dealing with health problems and health promotion.
- Medical knowledge in the basic biomedical, behavioural and clinical sciences, medical ethics and medical jurisprudence and application of such knowledge in patient care.
- Interpersonal and communication skills that ensure effective information exchange with individual patients and their families and teamwork with other health professionals, the scientific community and the public.
- Appraisal and utilisation of new scientific knowledge to update and continuously improve clinical practice.
- Professionalism.
- Ability to understand health care and identify and carry out system-based improvement of care.

Professionalism

Medical professionalism is a core element of being a good doctor. Good medical practice is based on a relationship of trust between profession and society, in which doctors are expected to meet the highest standards of professional practice and behaviour. It involves partnership between patient and doctor that is based on mutual respect, confidentiality, honesty, responsibility and accountability. In addition to maintaining clinical competence, a doctor should also:

- Show integrity, compassion and concern for others in day-to-day practice
- Develop and maintain a sensitive and understanding attitude with patients
- Exercise good judgement and communicate sound clinical advice to patients
- Search for the best evidence to guide professional practice
- Be committed to continuous improvement and excellence in the provision of health care whether working alone or as part of a team

Prior to commencing their sponsored clinical placements, all participants will also be required to undergo the mandatory screening requirements of the relevant clinical site/service including occupational health assessment and Garda/Police clearance.

Training Programme Duration & Organisation of Training

The period of clinical training that will be provided under the International Clinical Fellowship Programme (ICFP) for medical specialities is up to 3 years, after which the overseas doctors will be required to return to their country of origin.

- Each ICFP is developed by the Royal College of Physicians of Ireland will be specifically designed so as to meet the training needs of participants to support the health service in their home country.
- All appointees to the ICFP will be assessed by the Royal College of Physicians of Ireland to ensure that they possess the necessary requirements from a training and clinical service perspective.
- Each overseas doctor participating in the ICFP will be enrolled with the Royal College of Physicians of Ireland and will be under the supervision of a consultant doctor who is registered on the Specialist Division of the Register of Medical Practitioners maintained by the Medical Council and who is an approved consultant trainer.
- Appointees to the ICFP will normally be registered on the Supervised Division of the Register of Medical Practitioners maintained by the Medical Council in Ireland.
- Appointees will agree a training plan with their trainers at the beginning of each training year.
- For the duration of their International Medical Graduate (IMG) programme and associated clinical placements, all participants will remain directly employed and directly paid by their sponsoring state at a rate appropriate to their training level in Ireland and benchmarked against the salary scales applicable to NCHD's in Ireland.
- Successful completion of an ICFP will result in the participant being issued with a formal Certificate of completion for the Fellowship Programme by the Royal College of Physicians of Ireland. This Certificate will enable the participant's parent training body in their sponsoring home country to formally recognise and accredit their time spent training in Ireland.

The training programme offered will provide opportunities to fulfil all the requirements of the curriculum of training. There will be posts in both general hospitals and teaching hospitals.

Each post within the programme will have a named trainer/educational supervisor and programmes will be under the direction of the National Specialist Director of the relevant medical speciality to be confirmed by the College. Programmes will be as flexible as possible consistent with curricular requirements, for example to allow the trainee to develop their sub-specialty interest.

ePortfolio logbook

Each trainee is responsible for maintaining an up-to-date record of progress through training and compiling a portfolio of achievements for presentation at each annual assessment review. The trainee also has a duty to maximise opportunities to learn, supplementing the training offered with additional self-directed learning in order to fulfil all the educational goals of the curriculum.

Up-to-date training records and an ePortfolio of achievements will be maintained by the trainee throughout. The training records will be countersigned as appropriate by the trainers to confirm the satisfactory fulfilment of the required training experience and the acquisition of the competencies set out in the training plan. They will remain the property of the trainee and must be produced at their annual assessment review.

Trainees must co-operate with the College in completing their training plan.

It is in a trainee's own interest to maintain contact with the Royal College of Physicians of Ireland, and to respond promptly to all correspondence relating to training. At review, your ePortfolio will be examined.

Review

A consultant trainer/educational supervisor will be identified for each participant in the programme. He/she will be responsible for ensuring that the educational potential of the post is translated into effective training which is being fully utilized. Only departments approved for Training by the Royal College of Physicians of Ireland and its constituent training bodies will be used.

The training objectives to be secured should be agreed between each trainee and trainer at the commencement of each posting in the form of a written training plan. The trainer will be available throughout, as necessary, to supervise the training process. In each year trainees undergo a formal review by an appropriate panel. The panel will review in detail the training record, will explore with the trainee the range of experience and depth of understanding which has been achieved and consider individual trainer's reports. An opportunity is also given to the trainee to comment on the training being provided; identifying in confidence any deficiencies in relation to a particular post.

A quarterly and annual review of progress through training will be undertaken on behalf of the International Clinical Fellowship Programme (ICFP). These will include assessments and reports by educational supervisors, confirmation of achievements and the contents of the ePortfolio will be reviewed. At some or all of these annual reviews a non-specialty assessor will be present capable of addressing core competencies.

The award of a Certificate of completion will be determined by a satisfactory outcome after completion of the entire series of assessments.

Generic Components

This chapter covers the generic components which are relevant to National and International Trainees within the Faculty of Paediatrics but with varying degrees of relevance and appropriateness, depending on the specialty.

As such, this chapter needs to be viewed as an appropriate guide of the level of knowledge and skills required from all HST trainees with differing application levels in practice.

Good Professional Practice

Objective: Trainees must appreciate that medical professionalism is a core element of being a good doctor and that good medical practice is based on a relationship of trust between the profession and society, in which doctors are expected to meet the highest standards of professional practice and behaviour.

Medical Council Domains of Good Professional Practice: Relating to Patients, Communication and Interpersonal Skills, Professionalism, Patient Safety and Quality of Patient Care.

KNOWLEDGE

Effective Communication

- How to listen to patients and colleagues
- The principles of open disclosure
- Knowledge and understanding of valid consent
- Teamwork
- Continuity of care

Ethics

- Respect for autonomy and shared decision making
- How to enable children and their family to make their own decisions about their health care
- How to place the patient at the centre of care
- How to protect and properly use sensitive and private patient information in accordance with data protection legislation and how to maintain confidentiality
- The judicious sharing of information with other healthcare professionals where necessary for care following Medical Council Guidelines
- Maintaining competence and assuring quality of medical practice
- How to work within ethical and legal guideline when providing clinical care, carrying research and dealing with end of life issues

Honesty, openness and transparency (mistakes and near misses)

- Preventing and managing near misses and adverse events.
- When and how to report a near miss or adverse event
- Incident reporting; root cause and system analysis
- Understanding and learning from errors
- Understanding and managing clinical risk
- Managing complaints
- Following open disclosure practices
- Knowledge of national policy and National Guidelines on Open Disclosure

Raising concerns about patient safety

- Safe working practice, role of procedures and protocols in optimal practice
- The importance of standardising practice through the use of checklists, and being vigilant
- Safe healthcare systems and provision of a safe working environment
- Awareness of the multiple factors involved in failures
- Knowledge and understanding of Reason's Swiss cheese model
- Understanding how and why systems break down and why errors are made
- Health care errors and system failures
- Human and economic costs in system failures
- The important of informing a person of authority of systems or service structures that may lead to unsafe practices which may put patients, yourself or other colleagues at risk
- Awareness of the Irish Medical Councils policy on raising concerns about safety in the environment in which you work

SKILLS

- Effective communication with patients, parents, guardians and colleagues
- Co-operation and collaboration with colleagues to achieve safe and effective quality patient care
- Being an effective team player
- Ethical and legal decision making skills
- Minimising errors during invasive procedures by developing and adhering to best-practice guidelines for safe surgery
- Minimising medication errors by practicing safe prescribing principles
- Ability to learn from errors and near misses to prevent future errors
- Managing errors and near-misses
- Using relevant information from complaints, incident reports, litigation and quality improvement reports in order to control risks
- Managing complaints
- Using the Open Disclosure Process Algorithm

ASSESSMENT & LEARNING METHODS

- Consultant feedback at annual assessment
- Educational supervisor's reports on observed performance (in the workplace): prioritisation of patient safety in practice
- RCPI Taught Programme
- Medical Council Guide to Professional Conduct and Ethics
- Reflective learning around ethical dilemmas encountered in clinical practice

Infection Control

Objective: To be able to appropriately manage infections and risk factors for infection at an institutional level, including the prevention of cross-infections and hospital acquired infection

Medical Council Domains of Good Professional Practice: Patient Safety and Quality of Patient Care; Management (including Self-Management).

KNOWLEDGE

Within a consultation

- The principles of infection control as defined by the HIQA
- How to minimise the risk of cross-infection during a patient encounter by adhering to best practice guidelines available, including the 5 Moments for Hand Hygiene guidelines
- The principles of preventing infection in high risk groups e.g. managing antibiotic use to prevent *Clostridium difficile*
- Knowledge and understanding of the local antibiotic prescribing policy
- Awareness of infections of concern, e.g. MRSA, *Clostridium difficile*
- Best practice in isolation precautions
- When and how to notify relevant authorities in the case of notifiable infectious disease
- Understanding the increased risk of infection to patients in surgery or during an invasive procedure and adhering to guidelines for minimising infection in such cases
- The guidelines for needle-stick injury prevention and management

During an outbreak

- Guidelines for minimising infection in the wider community in cases of communicable diseases and how to seek expert opinion or guidance from infection control specialists where necessary
- Hospital policy/seeking guidance from occupational health professional regarding the need to stay off work/restrict duties when experiencing infections the onward transmission of which might impact on the health of others

SKILLS

- Practicing aseptic techniques and hand hygiene
- Following local and national guidelines for infection control and management
- Prescribing antibiotics according to antibiotic guidelines
- Encouraging staff, patients and relatives to observe infection control principles
- Communicating effectively with patients regarding treatment and measures recommended to prevent re-infection or spread
- Collaborating with infection control colleagues to manage more complex or uncommon types of infection including those requiring isolation e.g. transplant cases, immunocompromised host
- In the case of infectious diseases requiring disclosure:
 - Working knowledge of those infections requiring notification
 - Undertaking notification promptly
 - Collaborating with external agencies regarding reporting, investigating and management of notifiable diseases
 - Enlisting / requiring patients' involvement in solving their health problems, providing information and education
 - Utilising and valuing contributions of health education and disease prevention and infection control to health in a community

ASSESSMENT & LEARNING METHODS

- Consultant feedback at annual assessment
- Educational supervisor's reports on observed performance (in the workplace): practicing aseptic techniques as appropriate to the case and setting, investigating and managing infection, prescribing antibiotics according to guidelines
- Completion of infection control induction in the workplace

Self-Care and Maintaining Well-Being

Objectives:

1. To ensure that trainees understand how their personal histories and current personal lives, as well as their values, attitudes, and biases affect their care of patients so that they can use their emotional responses in patient care to their patients' benefit
2. To ensure that trainees care for themselves physically and emotionally, and seek opportunities for enhancing their self-awareness and personal growth

Medical Council Domains of Good Professional Practice: Patient Safety and Quality of Patient Care, Relating to Patients, Communication and Interpersonal Skills, Collaboration and Teamwork, Management (including self-management).

KNOWLEDGE

- Self-awareness including preferences and biases
- Personal psychological strengths and limitations
- Understand how personality characteristics, such as need for approval, judgemental tendencies, needs for perfection and control etc., affect relationships with patients and others
- Knowledge of core beliefs, ideals, and personal philosophies of life, and how these relate to own goals in medicine
- Know how family-of-origin, race, class, religion and gender issues have shaped own attitudes and abilities to discuss these issues with patients
- Understand the difference between feelings of sympathy and feelings of empathy
- Know the factors between a doctor and patient that enhance or interfere with abilities to experience and convey empathy
- Understanding of own attitudes toward uncertainty and risk taking and own need for reassurance
- How own relationships with certain patients can reflect attitudes toward paternalism, autonomy, benevolence, non-maleficence and justice
- Recognise own feelings in straightforward and complex patient-doctor interactions
- Recognising the symptoms of stress and burn out

SKILLS

- Exhibiting empathy and showing consideration for all patients, their impairments and attitudes irrespective of cultural and other differences
- Ability to create boundaries with patients that allow for therapeutic alliance
- Challenge authority appropriately from a firm sense of own values and integrity and respond appropriately to situations that involve abuse, unethical behaviour and coercion
- Recognise own limits and seek appropriate support and consultation
- Work collaboratively and effectively with colleagues and other members of health care teams
- Manage effectively commitments to work and personal lives, taking the time to nurture important relationship and oneself
- Ability to recognise when falling behind and adjusting accordingly
- Demonstrating the ability to cope with changing circumstances, variable demand, being prepared to re-prioritise and ask for help
- Utilising a non-judgemental approach to patient's problem
- Recognise the warning signs of emotional ill-health in self and others and be able to ask for appropriate help
- Commitment to lifelong process of developing and fostering self-awareness, personal growth and well being
- Be open to receiving feedback from others as to how attitudes and behaviours are affecting their care of patients and their interactions with others
- Holding realistic expectations of own and of others' performance, time-conscious, punctual
- Valuing the breadth and depth of experience that can be accessed by associating with professional colleagues

ASSESSMENT & LEARNING METHODS

- On-going supervision
- RCPI Taught Programme

Communication in Clinical and Professional Setting

Objective: To demonstrate the ability to communicate effectively and sensitively with patients, their relatives, carers and with professional colleagues in different situations.

Medical Council Domains of Good Professional Practice: Relating to Patients; Communication and Interpersonal Skills.

KNOWLEDGE

Within a consultation

- How to effectively listen and attend to patients, parents and guardians
- How to structure an interview to obtain/convey information; identify concerns, expectations and priorities; promote understanding, reach conclusions and use age appropriate language.
- How to empower the patient, and/or parent, and encourage self-management

Difficult circumstances

- Understanding of potential areas for difficulty and awkward situations
- How to negotiate cultural, language barriers, dealing with sensory or psychological and/or intellectual impairments and how to deal with challenging or aggressive behaviour
- Knowing how and when to break bad news
- How to communicate essential information where difficulties exist, how to appropriately utilise the assistance of interpreters, chaperones, and relatives.
- How to deal with anger and frustration in self and others
- Selecting appropriate environment; seeking assistance, making and taking time

Dealing with professional colleagues and others

- How to communicate with doctors and other members of the healthcare team
- How to provide a concise, written, verbal, or electronic, problem-orientated statement of facts and opinions
- The legal context of status of records and reports, of data protection confidentiality
- Freedom of Information (FOI) issues
- Understanding of the importance of legible, accessible, records to continuity of care
- Knowing when urgent contact becomes necessary and the appropriate place for verbal, telephone, electronic, or written communication
- Recognition of roles and skills of other health professionals
- Awareness of own abilities/limitations and when to seek help or give assistance, advice to others; when to delegate responsibility and when to refer

Maintaining continuity of care

- Understanding the relevance of continuity of care to outcome, within and between phases of healthcare management
- The importance of completion of tasks and documentation, e.g. before handover to another team, department, specialty, including identifying outstanding issues and uncertainties
- Knowledge of the required attitudes, skills and behaviours which facilitate continuity of care including, being available and contactable, alerting others to avoid potential confusion or misunderstanding through communications failure

Giving explanations

- The importance of possessing the facts, and of recognising uncertainty and conflicting evidence on which decisions have to be based
- How to secure and retain attention avoiding distraction
- Understanding how children and their guardians receive information best, the relative value of the spoken, written, visual means of communication, use of reinforcement to assist retention
- Knowledge of the risks of information overload
- Tailoring the communication of information to the level of understanding of the recipient
- Strategies to achieve the level of understanding necessary to gain co-operation and partnership; compliance, informed choice, acceptance of opinion, advice, recommendation

Responding to complaints

- Value of hearing and dealing with complaints promptly; the appropriate level, the procedures (departmental and institutional); sources of advice, and assistance available
- The importance of obtaining and recording accurate and full information, seeking confirmation from multiple sources
- Knowledge of how to establish facts, identify issues and respond quickly and appropriately to a complaint received

SKILLS

- Ability to appropriately elicit facts, using a mix of open and closed-ended questions
- Using “active listening” techniques such as nodding and eye contact
- Giving information clearly, avoiding jargon, confirming understanding, ability to encourage co-operation, compliance; obtaining informed consent
- Showing consideration and respect for other’s culture, opinions, patient’s right to be informed and make choices
- Respecting another’s right to opinions and to accept or reject advice
- Valuing perspectives of others contributing to management decisions
- Conflict resolution
- Dealing with complaints
- Communicating decisions in a clear and thoughtful manner
- Presentation skills
- Maintaining (legible) records
- Being available, contactable, time-conscious
- Setting realistic objectives, identifying and prioritising outstanding problems
- Using language, literature (e.g. leaflets) diagrams, educational aids and resources appropriately
- Establish facts, identify issues and respond quickly and appropriately to a complaint received
- Accepting responsibility, involving others, and consulting appropriately
- Obtaining informed consent
- Discussing informed consent
- Giving and receiving feedback

ASSESSMENT & LEARNING METHODS

- RCPI Taught Programme
- Consultant feedback at annual assessment
- Educational supervisor’s reports on observed performance (in the workplace): communication with others e.g. at handover. ward rounds, multidisciplinary team members
- Presentations

Leadership

Objective: To have the knowledge, skills and attitudes to act in a leadership role and work with colleagues to plan, deliver and develop services for improved patient care and service delivery.

Medical Council Domains of Good Professional Practice: Patient Safety and Quality of Patient Care; Communication and Interpersonal Skill; Collaboration and Teamwork; Management (including Self-Management); Scholarship.

KNOWLEDGE

Personal qualities of leaders

- Knowledge of what leadership is in the context of the healthcare system appropriate to training level
- The importance of good communication in teams and the role of human interactions on effectiveness and patient safety

Working with others

- Awareness of own personal style and other styles and their impact on team performance
- The importance of good communication in teams and the role of human interactions on effectiveness and patient safety

Managing services

- The structure and function of Irish health care system
- Awareness of the challenges of managing in healthcare
- Role of governance
- Clinical directors
- Knowledge of planning and design of services
- Knowledge and understanding of the financing of the health service
- Knowledge of how to prepare a budget
- Defining value
- Managing resources
- Knowledge and understanding of the importance of human factors in service delivery
- How to manage staff training, development and education
- Managing performance
- How to perform staff appraisal and deal effectively with poor staff performance
- How to rewards and incentivise staff for quality and efficiency

Setting direction

- The external and internal drivers setting the context for change
- Knowledge of systems and resource management that guide service development
- How to make decisions using evidence-based medicine and performance measures
- How to evaluate the impact of change on health outcomes through ongoing service evaluation

SKILLS

- Effective communication with patients, families and colleagues
- Co-operation and collaboration with others; patients, service users, carers colleagues within and across systems
- Being an effective team player
- Ability to manage resources and people
- Managing performance and performance indicators

Demonstrating personal qualities

- Efficiently and effectively managing one-self and one's time especially when faced with challenging situations
- Continues personal and professional development through scholarship and further training and education where appropriate
- Acting with integrity and honesty with all people at all times
- Developing networks to expand knowledge and sphere of influence
- Building and maintaining key relationships
- Adapting style to work with different people and different situations
- Contributing to the planning and design of services

ASSESSMENT & LEARNING METHODS

- RCPI Taught Programme

Consultant feedback at annual assessment

- Educational supervisor's reports on observed performance (in the workplace): on management and leadership skills
- Involvement in hospital committees where possible e.g. Resuscitation committee, POCT committee.

Quality Improvement

Objective: To demonstrate the ability to identify areas for improvement and implement basic quality improvement skills and knowledge to improve patient safety and quality in the healthcare system.

Medical Council Domains of Good Professional Practice: Patient Safety and Quality of Patient Care; Communication and Interpersonal Skills; Collaboration and Teamwork; Management; Relating to Patients; Professionalism

KNOWLEDGE

Personal qualities of leaders

- The importance of prioritising the patient and patient safety in all clinical activities and interactions

Managing services

- Knowledge of systems design and the role of microsystems
- Understanding of human factors and culture on patient safety and quality

Improving services

- How to ensure patient safety by adopting and incorporating a patient safety culture
- How to critically evaluate where services can be improved by measuring performance, and acting to improve quality standards where possible
- How to encourage a culture of improvement and innovation

Setting direction

- How to create a 'burning platform' and motivate other healthcare professionals to work together within quality improvement
- Knowledge of the wider healthcare system direction and how that may impact local organisations

SKILLS

- Improvement approach to all problems or issues
- Engaging colleagues, patients and the wider system to identify issues and implement improvements
- Use of quality improvement methodologies, tools and techniques within every day practice
- Ensuring patient safety by adopting and incorporating a patient safety culture
- Critically evaluating where services can be improved by measuring performance, and acting to raise standards where possible
- Encouraging a culture of improvement and innovation

Demonstrating personal qualities

- Encouraging contributions and involvement from others including patients, carers, members of the multidisciplinary team and the wider community
- Considering process and system design, contributing to the planning and design of services

ASSESSMENT & LEARNING METHODS

- RCPI Taught Programme
- Consultant feedback at annual assessment
- Involvement in hospital committees where possible e.g. Resuscitation Committee, Guidelines Committee.

Scholarship

Objective: To develop skills in personal/professional development, teaching, educational supervision and research

Medical Council Domains of Good Professional Practice: Scholarship

KNOWLEDGE

Teaching, educational supervision and assessment

- Principles of adult learning, teaching and learning methods available and strategies
- Educational principles directing assessment methods including, formative vs. summative methods
- The value of regular appraisal / assessment in informing training process
- How to set effective educational objectives and map benefits to learner
- Design and delivery of an effective teaching event, both small and large group
- Use of appropriate technology / materials

Research, methodology and critical evaluation

- Designing and resourcing a research project
- Research methodology, valid statistical analysis, writing and publishing papers
- Ethical considerations and obtaining ethical approval
- Reviewing literature, framing questions, designing a project capable of providing an answer
- How to write results and conclusions, writing and/or presenting a paper
- How to present data in a clear, honest and critical fashion

Audit

- Basis for developing evidence-based medicine, kinds of evidence, evaluation; methodologies of clinical trials
- Sources from which useful data for audit can be obtained, the methods of collection, handling data, the audit cycle
- Means of determining best practice, preparing protocols, guidelines, evaluating their performance
- The importance of re-audit

SKILLS

- Bed-side undergraduate and post graduate teaching
- Developing and delivering lectures
- Carrying out research in an ethical and professional manner
- Performing an audit
- Presentation and writing skills – remaining impartial and objective
- Adequate preparation, timekeeping
- Using technology / materials

ASSESSMENT & LEARNING METHODS

- RCPI Taught Programme

Management

Objective: To understand the organisation, regulation and structures of the health services, nationally and locally, and to be competent in the use and management of information on health and health services, to develop personal effectiveness and the skills applicable to the management of staff and activities within a healthcare team.

Medical Council Domains of Good Professional Practice: Management.

KNOWLEDGE

Health service structure, management and organisation

- The administrative structure of the Irish Health Service, services provided in Ireland and their funding and how to engage with these for best results
- Department of Health, HSE and hospital management structures and systems
- The national regulatory bodies, health agencies and patient representative groups
- Understanding the need for business plans, annual hospital budgets, the relationship between the hospital and PCCC

The provision and use of information in order to regulate and improve service provision

- Methods of collecting, analysing and presenting information relevant to the health of a population and the apportionment of healthcare resources
- The common ways in which data is presented, knowing of the sources which can provide information relevant to national or to local services and publications available

Maintaining medical knowledge with a view to delivering effective clinical care

- Understanding the contribution that current, accurate knowledge can make to establishing clinical effectiveness, best practice and treatment protocols
- Knowledge of sources providing updates, literature reviews and digests

Delegation skills, empowerment and conflict management

- How to assess and develop personal effectiveness, improve negotiating, influencing and leadership skills
- How to manage time efficiently, deal with pressure and stress
- How to motivate others and operate within a multidisciplinary team

SKILLS

- Chairing, organising and participating in effective meetings
- Managing risks
- Managing time
- Delegating tasks effectively
- Managing conflicts
- Exploring, directing and pursuing a project, negotiating through the relevant departments at an appropriate level
- Ability to achieve results through an understanding of the organisation and its operation
- Ability to seek / locate information in order to define an issue needing attention e.g. to provide data relevant to a proposal for change, establishing a priority, obtaining resources
- Ability to make use of information, use IT, undertake searches and obtain aggregated data, to critically evaluate proposals for change e.g. innovative treatments, new technologies
- Ability to adjust to change, apply management, negotiating skills to manage change
- Appropriately using management techniques and seeking to improve these skills and personal effectiveness

ASSESSMENT & LEARNING METHODS

- RCPI Taught Programme
- Annual audit
- Consultant feedback on management and leadership skills
- Involvement in hospital committees

Standards of Care

Objective: To be able to consistently and effectively assess and treat patients' problems

Medical Council Domains of Good Professional Practice: Patient Safety and Quality of Patient Care; Relating to Patients; Communication and Interpersonal Skills; Collaboration and Teamwork: Management (including Self-Management); Clinical Skills.

KNOWLEDGE

Diagnosing Patients

- How to carry out appropriate history taking
- How to appropriately examine a patient
- How to make a differential diagnosis

Investigation, indications, risks, cost-effectiveness

- The pathophysiological basis of the investigation
- Understand the clinical significance of reference ranges, positive and negative predictive value and potential risks of inappropriate tests
- The procedures for commonly used investigations, common or/and serious risks
- Understanding of the sensitivity and specificity of results, artefacts, PPV and NPV
- Understanding significance, interpreting and explaining results of investigations
- Logical approach in choosing, sequencing and prioritising investigations

Treatment and management of disease

- Natural history of diseases
- Quality of life concepts
- How to accurately assess patient's needs, prescribe, arrange treatment, recognise and deal with reactions / side effects
- How to set realistic therapeutic goals, to utilise rehabilitation services, and use palliative care approach appropriately
- Recognising that illness (especially chronic and/or incapacity) has an impact on relationships and family, having financial as well as social effects

Disease prevention and health education

- Screening for disease: methods, advantages and limitations
- Health promotion and support agencies; means of providing sources of information for patients
- Risk factors, preventive measures, and change strategies applicable to smoking, alcohol, drug abuse, and lifestyle
- Disease notification; methods of collection and sources of data

Notes, records, correspondence

- Functions of medical records, their value as an accurate up-to-date commentary and source of data
- An understanding of the need and appropriate use of problem-orientated discharge notes, letters, more detailed case reports, concise out-patient reports and focused reviews
- Appreciating the importance of up-to-date, easily available, accurate information, and the need for communicating promptly e.g. with primary care

Prioritising, resourcing and decision taking

- How to prioritise demands, respond to patients' needs and sequence urgent tasks
- Establishing (clinical) priorities e.g. for investigations, intervention; how to set realistic goals; understanding the need to allocate sufficient time, knowing when to seek help
- Understanding the need to complete tasks, reach a conclusion, make a decision, and take action within allocated time
- Knowing how and when to conclude

Handover

- Know what are the essential requirements to run an effective handover meeting
 - Sufficient and accurate patients information
 - Adequate time
 - Clear roles and leadership
 - Adequate IT
- Know how to prioritise patient safety
 - Identify most clinically unstable patients
 - Use ISBAR (Identify, Situation, Background, Assessment, Recommendations)
 - Proper identification of tasks and follow-ups required
 - Contingency plans in place
- Know how to focus the team on actions
 - Tasks are prioritised
 - Plans for further care are put in place
 - Unstable patients are reviewed

Relevance of professional bodies

- Understanding the relevance to practice of standards of care set down by recognised professional bodies – the Medical Council, Medical Colleges and their Faculties, and the additional support available from professional organisations e.g. IMO, Medical Defence Organisations and from the various specialist and learned societies

SKILLS

- Taking and analysing a clinical history and performing a reliable and appropriate examination, arriving at a diagnosis and a differential diagnosis
- Liaising, discussing and negotiating effectively with those undertaking the investigation
- Selecting investigations carefully and appropriately, considering (patients') needs, risks, value and cost effectiveness
- Appropriately selecting treatment and management of disease
- Discussing, planning and delivering care appropriate to patient's needs and wishes
- Preventing disease using the appropriate channels and providing appropriate health education and promotion
- Collating evidence, summarising, recognising when objective has been met
- Screening
- Working effectively with others including
 - Effective listening
 - Ability to articulate and deliver instructions
 - Encourage questions and openness
 - Leadership skills
- Ability to prioritise
- Ability to delegate effectively
- Ability to advise on and promote lifestyle change, stopping smoking, control of alcohol intake, exercise and nutrition
- Ability to assess and explain risk, encourage positive behaviours e.g. immunisation and preventive measures
- Involve patients' in solving their health problems, by providing information and education
- Availing of support provided by voluntary agencies and patient support groups, as well as expert services e.g. detoxification / psychiatric services
- Act in accordance with, up to date standards on palliative care needs assessment
- Valuing contributions of health education and disease prevention to health in a community
- Compile accurate and appropriate detailed medical notes and care reports including the results of examinations, investigations, procedures performed, sufficient to provide an accurate, detailed account of the diagnostic and management process and outcome, providing concise, informative progress reports (both written and oral)
- Transfer information in an appropriate and timely manner

- Maintaining legible records in line with the Guide to Professional Conduct and Ethics for Registered Medical Practitioners in Ireland
- Actively engaging with professional/representative/specialist bodies

ASSESSMENT & LEARNING METHODS

- Consultant feedback
- Educational supervisor's reports on observed performance (in the workplace)
- Audit
- Medical Council Guide to Professional Conduct and Ethics

Dealing with & Managing Acutely Ill Patients in Appropriate Specialties

Objectives: To be able to assess and initiate management of patients presenting as emergencies, and to appropriately communicate the diagnosis and prognosis. Trainees should be able to recognise the critically ill and immediately assess and resuscitate if necessary, formulate a differential diagnosis, treat and/or refer as appropriate, elect relevant investigations and accurately interpret reports.

Medical Council Domains of Good Professional Practice: Patient Safety and Quality of Patient Care, Clinical Skills.

KNOWLEDGE

Management of acutely ill patients with medical problems

- Presentation of potentially life-threatening problems
- Indications for urgent intervention, the additional information necessary to support action (e.g. results of investigations) and treatment protocols
- When to seek help, refer/transfer to another specialty
- APLS protocols
- Ethical and legal principles relevant to resuscitation and DNAR in line with National Consent Policy
- How to manage acute medical intake, receive and refer patients appropriately, interact efficiently and effectively with other members of the medical team, accept/undertake responsibility appropriately
- Management of overdose
- How to anticipate / recognise, assess and manage life-threatening emergencies, recognise significantly abnormal physiology e.g. dysrhythmia and provide the means to correct e.g. defibrillation
- How to convey essential information quickly to relevant personnel: maintaining legible up-to-date records documenting results of investigations, making lists of problems dealt with or remaining, identifying areas of uncertainty; ensuring safe handover

Managing the deteriorating patient

- How to categorise a patients' severity of illness using Pediatric Early Warning Scores (PEWS) guidelines
- How to perform an early detection of patient deterioration
- How to use a structured communication tool (ISBAR)
- How to promote an early medical review, prompted by specific trigger points
- How to use a definitive escalation plan

Discharge planning

- Knowledge of patient pathways
- How to distinguish between illness and disease, disability and dependency
- Understanding the potential impact of illness and impairment on activities of daily living, family relationships, status, independence, awareness of quality of life issues
- Role and skills of other members of the healthcare team, how to devise and deliver a care package
- The support available from other agencies e.g. specialist nurses, social workers, community care
- Principles of shared care with the general practitioner service
- Awareness of the pressures/dynamics within a family, the economic factors delaying discharge but recognise the limit to benefit derived from in-patient care

SKILLS

- BLS/APLS
- Dealing with common medical emergencies
- Interpreting blood results, ECG/Rhythm strips, chest X-Ray, CT brain
- Giving clear instructions to both medical and hospital staff
- Ordering relevant follow up investigations
- Discharge planning, including complex discharge
- Knowledge of HIPE (Hospital In-Patient Enquiry)
- Multidisciplinary team working
- Communication skills
- Delivering early, regular and on-going consultation with family members (with the patient's permission) and primary care physicians
- Remaining calm, delegating appropriately, ensuring good communication
- Attempting to meet patients'/ relatives' needs and concerns, respecting their views and right to be informed in accordance with Medical Council Guidelines
- Establishing liaison with family and community care, primary care, communicate / report to agencies involved
- Demonstrating awareness of the wide ranging effects of illness and the need to bridge the gap between hospital and home
- Categorising a patients' severity of illness
- Performing an early detection of patient deterioration
- Use of structured communication tools (e.g. ISBAR)

ASSESSMENT & LEARNING METHODS

- APLS or PALS course recommended
- ATLS course
- Consultant feedback

Therapeutics and Safe Prescribing

Objective: To progressively develop ability to prescribe, review and monitor appropriate therapeutic interventions relevant to clinical practice in specific specialities including non-pharmacological therapies and preventative care.

Medical Council Domains of Good Professional Practice: Patient Safety and Quality of Patient Care.

KNOWLEDGE

- Pharmacology, therapeutics of treatments prescribed, choice of routes of administration, dosing schedules, compliance strategies; the objectives, risks and complications of treatment cost-effectiveness
- Indications, contraindications, side effects, drug interaction, dosage and route of administration of commonly used drugs
- Commonly prescribed medications
- Adverse drug reactions to commonly used drugs, including complementary medicines
- Identifying common prescribing hazards
- Identifying high risk medications
- Drugs requiring therapeutic drug monitoring and interpretation of results
- The effects of age, body size, organ dysfunction and concurrent illness or physiological state e.g. pregnancy on drug distribution and metabolism relevant to own practice
- Recognising the roles of regulatory agencies involved in drug use, monitoring and licensing e.g. IMB, and hospital formulary committees
- Procedure for monitoring, managing and reporting adverse drug reaction
- The role of The National Medicines Information Centre (NMIC) in promoting safe and efficient use of medicine
- Differentiating drug allergy from drug side effects
- Know the difference between an early and late drug allergy, and drug side-effects
- Good Clinical Practice guidelines for seeing and managing patients who are on clinical research trials
- Best practice in the pharmacological management of cancer pain
- The management of constipation in children receiving palliative care

SKILLS

- Writing a prescription in line with guidelines
- Appropriately prescribing for children and pregnant adolescent
- Making appropriate dose adjustments following therapeutic drug monitoring, or physiological change (e.g. deteriorating renal function)
- Reviewing and revising patients' long term medications
- Anticipating and avoiding defined drug interactions, including complementary medicines
- Providing comprehensible explanations to the patient, and carers when relevant, for the use of medicines
- Being open to advice and input from other health professionals on prescribing
- Participating in adverse drug event reporting
- Take and record an accurate drug allergy history and history of previous side effects

ASSESSMENT & LEARNING METHODS

Consultant feedback

Educational supervisor's reports on observed performance (in the workplace): prioritisation of patient safety in prescribing practice

Guidance for health and social care providers (please cf. <https://www.hiqa.ie/guidance-providers/childrens-services>)

Specialty Section

Core Competencies of the Paediatric Emergency Physician

Objective: To ensure that there is optimal care for the child in the paediatric emergency department and work with colleagues and other professionals in the hospital and beyond it to provide care in the best interests of the child including their biological, physical and social needs.

KNOWLEDGE

- Knowledge of the ABCDE approach.
- Neonatal, trauma and paediatric life support and resuscitation
- Understand accurate formulation of the presenting problem, in the context of a busy setting
- Understanding of relevant biological, psychological, educational and social factors
- Knowledge of medications commonly used for resuscitation, stabilisation and Pain control.
- Knowledge of the legal requirements of reports as required by legal bodies such as courts and be able to present them in these contexts when duty bound to do so
- Understand the need for continuous re-evaluation of the child, with adjustment of the provisional diagnosis and care when it becomes necessary
- Knowledge of local policies of Do not attempt to resuscitate (DNAR) and limitations of therapeutic interventions
- Understand the legal framework of the country in which they are working

SKILLS

- To undertake the efficient assessment, management and decision making in the environment of a large number of patients with rapidly changing priorities.,
- To assess, establish and maintain: Airway [A], Breathing [B], Circulation [C], Disability [D] and Exposure [E] of a patient requiring resuscitation.
- Trauma, Neonatal and paediatric life support and resuscitation core skills
- Minor procedure skills such as manipulation of joints, removal of foreign bodies and effective wound closure.
- Be able to effectively manage a child presenting with pain and safely administer regional nerve blocks and procedural sedation when required.
- Lead the resuscitation team and advise the resuscitation team if required and liaise effectively with other teams such as retrieval, intensive care, trauma and anaesthetic services.
- Take a leadership role in the preparation for major incidents in context of the overall major incident plan for the hospital
- Effective communication skills
- To make clinical decisions including:
 - re-triage
 - immediate and/or definitive care provided in the ED
 - planning for admission or discharge
- To seek assistance from other senior colleagues or other services when beneficial to the care of the child.
- To make contemporaneous medical records
- To make decisions on the most likely diagnosis and discuss this effectively with the patient and carers and with other colleagues. To direct safe and appropriate investigation and management, and be able to recognise and manage cases which are life threatening or of unusual pathology
- To give special attention to involving the family and the child in decision-making, seeking informed consent for diagnostic and therapeutic procedures, sharing information, breaking bad news, giving advice and recommendations on discharge and also communicating with populations with language barriers
- To assess whether a child has the competence to make an informed decision. To understand the legal rights of the parents or a guardian.
- To recognise patterns of illness or injury which might suggest neglect, physical or sexual abuse or domestic violence to children and to initiate appropriate child protection procedures.

ASSESSMENT & LEARNING METHODS

- Clinical placement in relevant specialities when available
- Case Based Discussions
- APLS or similar course recommended
- Safe prescribing course
- Communication Skills course
- HST Clinical Leadership course
- ATLS (recommended)
- CHI ED Procedural Sedation Course or equivalent (mandatory)
- Neonatal Resuscitation Course (recommended)
- FAST course (recommended)

System-Based Core Knowledge

Objective: To care for children from presentation until discharge home or referral to other health professionals. To manage a wide range of pathology from the life-threatening to the self-limiting and from age 0 to up to 16 years, or according to local policy.

KNOWLEDGE

Cardiovascular Emergencies in Children and Adolescents

- Arrhythmias
- SVT, Ventricular Tachycardia, Re entry Tachycardias, Torsade de Pointes
- Congenital heart disorders
- Hypoplastic left ventricle, aortic stenosis, coarctation of the aorta
- Atrial septal defect, ventricular septal defect, atrioventricular canal, patent ductus arteriosus
- Tetralogy of Fallot, double-outlet right ventricle, pulmonary stenosis, transposition of the great arteries
- Tricuspid atresia, Ebstein anomaly
- Pulmonary abnormal venous return
- Contractility disorders, pump failure
- Cardiomyopathies, congestive heart failure, acute pulmonary oedema, tamponade
- Inflammatory and infectious cardiac disorders
- Endocarditis, myocarditis, pericarditis, Kawasaki disease
- Ischaemic heart disease
- Abnormal left coronary artery, acute coronary syndromes
- Traumatic injuries
- Vascular and thrombotic disorders
- Thrombophlebitis, pulmonary embolism
- Hypertensive emergencies
- Pulmonary hypertension

Dermatological Emergencies in Children and Adolescents

- Inflammatory and Infectious disorders
- Skin manifestations of
- Congenital disorders Toxic disorders (e.g. Stephen Johnson)
- Systemic disorders

Endocrine and Metabolic Emergencies in Children and Adolescents

- Acute presentation of inborn errors of metabolism
- Adrenal insufficiency and crisis
- Disorders of glucose metabolism
- Hyperosmolar hyperglycaemic state, ketoacidosis, hypoglycaemia
- Thyroid disease emergencies
- Hyperthyroidism, hypothyroidism, myxoedema coma

Fluid and Electrolyte Disturbances in Children and Adolescents

- Acid-Base Disorders
- Electrolyte Disorders
- Hyponatraemia, hyponatraemia, hyperkalaemia, hypokalaemia, hypercalcaemia, hypocalcaemia
- Volume status and fluid balance
- Dehydration, oedema

Ear, Nose, Throat, Oral, Dental and Neck Emergencies in Children and Adolescents

- Bleeding
- Airway obstruction
- Foreign bodies
- Inflammatory and Infectious disorders
- Angio-oedema, epiglottitis, laryngitis, paratonsillar abscess

- Traumatic problems
- Dental emergencies

Gastrointestinal Emergencies in Children and Adolescents

- Congenital disorders
- Oesophageal atresia, intestinal atresia, intestinal duplication, anal atresia
- Pyloric stenosis, Meckel's diverticulum, Hirschsprung's disease
- Inflammatory and Infectious diseases
- Appendicitis, cholecystitis, cholangitis, diverticulitis, exacerbations and complications of inflammatory bowel diseases, gastritis, gastroenteritis, gastro-oesophageal reflux disease, hepatitis, pancreatitis, peptic ulcer, peritonitis
- Metabolic disorders
- Traumatic and mechanical problems
- Foreign bodies, hernia strangulation, intestinal occlusion (volvulus, etc.)
- Tumours
- Vascular diseases: Ischaemia and bleeding
- Necrotising enterocolitis, mesenteric ischaemia, upper and lower gastrointestinal bleeding, ischaemic colitis
- Other problems
- Complications of gastrointestinal devices and surgical procedures

Gynaecological Emergencies in Children and Adolescents

- Inflammatory and Infectious disorders
- Vulvovaginitis, mastitis
- Traumatic and related problems
- Ovarian torsion
- Vaginal bleeding
- Obstetric emergencies in Children and Adolescents (Discretionary)

Haematology and Oncology Emergencies in Children and Adolescents

- Anaemias
- Complications of leukaemias and lymphomas
- Lysis syndrome
- Neutropenia
- Thrombocytopenia congenital disorders
- Sickle cell disease, hereditary haemolytic anaemias, haemophilias, and Von Willebrand's disease
- Inflammatory and Infectious disorders
- Neutropenic fever, infections in immuno-compromised patients
- Vascular disorders: Ischaemia and bleeding
- Acquired bleeding disorders (coagulation factors deficiency, disseminated intravascular coagulation), drug-induced bleeding (anticoagulants, antiplatelet agents, fibrinolytics), idiopathic thrombocytopenic purpura, thrombotic thrombocytopenic purpura, Henoch Schönlein's purpura
- Transfusion reactions

Immunological Emergencies in Children and Adolescents

- Allergies and anaphylactic reactions
- Inflammatory and Infectious disorders
- Acute complications of vasculitis

Infectious Diseases and Sepsis in Children and Adolescents

- Common viral, fungal and bacterial infections
- Food and water-borne infectious diseases
- Common tropical diseases
- Parasitosis
- Sepsis and septic shock
- Sexually transmitted infections

- Staphylococcal and Streptococcal toxic shock syndrome
- Tetanus
- Blood borne viruses

Musculo-Skeletal Emergencies in Children and Adolescents

- Congenital disorders
- Developmental dysplasia of the hip, osteogenesis imperfecta
- Inflammatory and Infectious disorders
- Juvenile idiopathic arthritis and its complications, bursitis, cellulitis, necrotising fasciitis, osteomyelitis, septic arthritis, polymyalgia rheumatica, soft tissue infections
- Metabolic disorders
- Complications of other systemic diseases
- Traumatic and degenerative disorders
- Back disorders, common fractures and dislocations, compartment syndromes, crush syndrome, osteoarthritis, rhabdomyolysis, soft tissue trauma
- Tumours:
 - Pathological fractures
 - Bone tumours

Neonatal emergencies

- Care for the newborn in the emergency department including initial resuscitation.

Neurological and Neurosurgical Emergencies in Children and Adolescents

- Inflammatory and Infectious disorders
- Brain abscess, encephalitis, febrile seizures in children, Guillain-Barré syndrome, meningitis, facial palsy (Bell's palsy), temporal arteritis
- Traumatic and related problems
- Spinal cord syndromes, peripheral nerve trauma and entrapment, traumatic brain injury
- Tumours
- Common presentations and acute complications of neurological and metastatic tumours
- Vascular disorders: Ischaemia and Bleeding
- Stroke, subarachnoid haemorrhage, subdural and extradural haematomata, transient ischaemic attack, venous sinus thrombosis
- Other problems
- Acute complications of chronic neurological conditions ,acute peripheral neuropathies, seizures and status epilepticus

Ophthalmic Emergencies in Children and Adolescents

- Inflammatory and Infectious disorders
- Conjunctivitis, dacryocystitis, endophthalmitis, iritis, keratitis, orbital and periorbital cellulitis, uveitis
- Traumatic and related problems
- Foreign body in the eye, ocular injuries,
- Vascular disorders: Ischaemia and Bleeding
- Retinal artery and vein occlusion, vitreous haemorrhage
- Others
- Acute glaucoma, retinal detachment

Pulmonary Emergencies in Children and Adolescents

- Congenital
- Adenomatoid lung, pulmonary sequestration
- Congenital diaphragmatic hernia
- Laryngeal, tracheal stenosis
- Cystic fibrosis
- Inflammatory and Infectious disorders
- Asthma, bronchitis, bronchiolitis, BPD exacerbation, empyema, lung abscess, pleurisy and pleural effusion, pneumonia, pulmonary fibrosis, tuberculosis
- Traumatic and related problems

- Foreign body inhalation, haemothorax, tension pneumothorax, pneumomediastinum
- Tumours
- Common complications and acute complications of pulmonary and metastatic tumours,
- Vascular disorders
- Pulmonary embolism
- Other disorders
- Acute lung injury, ARDS, atelectasis, spontaneous pneumothorax

Psychiatric and Behaviour Disorders in Children and Adolescents

- Behaviour disorders
- Autism and communication disorders, affective disorders, confusion and consciousness disturbances, intelligence disturbances, memory disorders, perception disorders, psychomotor disturbances.
- Common psychiatric emergencies
- Acute psychosis, anorexia and bulimia complications, anxiety and panic attacks, conversion disorders, deliberate self-harm and suicide attempt, depressive illness, personality disorders, substance, drug and alcohol abuse

Renal and Urological Emergencies in Children and Adolescents

- Congenital
- Urinary tract malformations
- Inflammatory and Infectious disorders
- Glomerulonephritis, haemolytic uraemic syndrome, urinary tract infections, pyelonephritis, epididymo-orchitis, sexually transmitted infections
- Metabolic disorders
- Acute renal failure, nephrotic syndrome, nephrolithiasis
- Traumatic and related problems
- Urinary retention, testicular torsion
- Tumours
- Vascular disorders: Ischaemia and Bleeding

Other disorders

- Comorbidities in dialysis and renal transplanted patients, complications of urological procedures and devices

Surgical Emergencies in Children and Adolescents

- Abdominal emergencies
- Appendicitis, Peritonitis, Peforation, Bowel Obstruction
- Haemorrhage upper or lower GI
- Intususception
- Pyloric stenosis
- Penetrating or blunt trauma
- Testicular torsion
- Strangulated hernia
-

Trauma in Children and Adolescents

- Burns, blunt trauma, penetrating trauma
- Anatomical location of trauma:
- Head and neck, maxillo-facial, thorax, abdomen, pelvis, spine, extremities
- Polytrauma patient
- Frequent trauma in children:
- Wounds and bruises
- Nail finger crushes
- Drowning and submersion injuries

SKILLS

- Triage
- ABCDE assessment and knowledge of acute lifesaving emergency procedures.
- Lead a resuscitation team
- To take a clinical history, diagnostic work up and plan management of the patient
- To understand the impact of illness on mental functioning, for both children and their carers, and the effect of each on the behaviours and functioning of the other
- Clinical decision-making skills
- Clear clinical documentation
- Perform pain free minor procedures
- Communication skills – to be sensitive to the needs of family and carers
- Multidisciplinary team working

ASSESSMENT & LEARNING METHODS

- APLS/ACLS (recommended)
- Communication skills
- Above knowledge is to be gained through clinical experience, simulation, courses and reading.

Specific Aspects of Emergency Medicine

KNOWLEDGE

Abuse and Assault in Children and Adults

- Child abuse and neglect
- Intimate partner violence and abuse
- Sexual assault
- Patient safety in emergency medicine
- Violence management and prevention in the emergency department

Analgesia, Sedation and Drug Prescribing in Children

- Understanding the pharmacological characteristics of commonly prescribed drugs
- Pain transmission (anatomy, physiology, pharmacology)
- Pain assessment
- Pharmacology of sedative and pain-relieving drugs
- Psychological and social aspects of pain in paediatric and adolescent patients

Disaster Medicine (discretionary)

- Disaster preparedness, disaster response
- Major incident planning/procedures/practice
- Mass gatherings
- Specific topics (triage, bioterrorism, blast and crush injuries, chemical agents, radiation injuries)
- Debriefing and mitigation

Environmental Accidents in Children

- Electricity (electrical and lightning injuries)
- Flora and Fauna (injuries from exposure, bites and stings)
- High-altitude (medical problems)
- NBCR (nuclear, biological, chemical and radiological, decontamination, specific aspects)
- Temperature (heat and cold related emergencies)
- Travel medicine
- Water (drowning, complications of diving)

Forensic Issues (discretionary)

- Basics of relevant legislation in the country of practice
- Recognise and preserve evidence
- Provide appropriate medical documentation (including forensic and clinical photography, collection of biological samples, ballistics)
- Appropriate reporting and referrals (e.g. child abuse or neglect, gunshot and other forms of penetrating wounds, elder abuse, sexual assault allegations)
- Medico legal documentation
- Understanding the importance of post-mortem examination and knowing the relevant guidelines relating to obtaining consent for post-mortem examination.

Injury Prevention and Health Promotion

- Collection and interpretation of data related to prevention and health promotion
- Epidemiology of Accidents and Emergencies
- Formulation of recommendations

Patient Management Issues in Emergency Medicine

- Emergency department organisation (administration, structure, staffing, resources)
- Management of specific populations:
- Children in special circumstances including child protection
 - Homeless families
 - Mentally incompetent adolescents
 - Psychiatric patients

Problems in the Neonate

- Neonatal failure to thrive
- Neonatal jaundice
- Neonatal seizures
- Neonatal sepsis

Toxicology in Children

- General principles of toxicology and management of poisoned patients
- Principles of drug interactions
- Specific aspects of poisoning
- Drugs (eg, acetaminophen, amphetamine, anticholinergic, anticonvulsants, antidepressants, antihypertensives, benzodiazepines, digitalis, monoamine oxidase inhibitors, neuroleptics)
- Industrial chemicals
- Plants & mushrooms
- Alcohol abuse and alcohol poisoning
- Drugs of abuse
- Organisation and information (e.g. poison centres, data bases)

Pre-Hospital Care (discretionary)

- Emergency Medical Services organisation (administration, structure, staffing, resources)
- Medical transport (including neonates and children, air transport)
- Paramedic training and function
- Safety at the scene
- Collaboration with other emergency services (e.g. police, fire department)

Psycho-Social Problems

- Social wellbeing of specific populations
- Patients with social issues
- Frequent attenders to a PED
- Social care following discharge

SKILLS

- Be aware of life and limb saving emergency procedures and when they are required.
- To prescribe safely and effectively, knowing the pharmacokinetics and pharmacodynamics of commonly prescribed drugs.
- To respond appropriately to errors of prescription, and be able to investigate any adverse effect or drug error.
- Be aware of local and national guidelines for pain relief and sedation in children and be able to safely calculate and prescribe resuscitation drugs and fluids to complex surgical and medical patients in the ED setting.
- Effective communication with children, families, social support services and gardai (local police/law enforcement officers)
- Managing a sexually or physically assaulted child or adolescent
- Communicate with pre-hospital and paediatric retrieval teams

ASSESSMENT & LEARNING METHODS

- APLS/ACLS (recommended)
- Communication skills

Documentation of Minimum Requirements for Training

- These are the minimum number of cases you are asked to document as part of your training. **It is recommended you seek opportunities to attain a higher level of exposure as part of your self-directed learning and development of expertise.**
- You should expect the demands of your post to exceed the minimum required number of cases documented for training.
- If you are having difficulty meeting a particular requirement, please contact your speciality coordinator.

Curriculum Requirement	Required/Desirable	Minimum Requirement	Reporting Period	Form Name
Section 1 - Training Plan				
Personal Goals Plan (Agreed Training Plan for your current training year signed by both Trainee & Trainer)	Required	1	Training Post	Personal Goals Plan
Section 2 - Training Activities				
Emergencies/Complicated Cases Throughout the fellowship, clinical experience in the emergency department will provide the training in emergency and complicated cases	Required	5	Year of Training	Cases
Procedures/Practical Skills/Surgical Skills These are to be take place in clinical practice or during simulation				Procedures, Skills & DOPS
Chest tube insertion (One observing, one being observed) can be done via SIM where available	Desirable	2	Training Programme	
Effective BVM can be done via SIM where available	Required	10	Training Programme	
ETT Insertion (across different age ranges)	Required	10	Training Programme	
Defibrillation and pacing	Required	2	Training Programme	
Vascular Access (including 10 under ultrasound guidance)	Required	20	Training Programme	
Ultrasound Observe and do under supervision: 3 hips, 3 femoral nerve block	Desirable	6	Training Programme	
Insertion of nasogastric tube	Required	3	Training Programme	
Manipulation of dislocated joint (varied joints)	Required	3	Training Programme	
Lumbar Puncture	Required	5	Training Programme	
Anaesthesia for intubations	Required	10	Training Programme	
Additional/Special Experience Gained				
Clinical placement in relevant specialties (discretionary) <ul style="list-style-type: none"> • Toxicology • Prehospital Experience 	Desirable	Approx 2 weeks of	Training Programme	Additional Professional Experience

Curriculum Requirement	Required/Desirable	Minimum Requirement	Reporting Period	Form Name
<ul style="list-style-type: none"> Adult/Trauma Experience Paediatric Intensive Care 		each, 1 month of PICU		
Relatively Unusual Cases	Desirable	1	Training Programme	
Section 3 - Educational Activities				
Courses				Teaching Attendance
RCPI Taught Programme (details in the appendix)				
APLS or PALS	Desirable	1	Training Programme	
ATLS	Required	1	Training Programme	
Diagnostic ultrasound level 1	Desirable	1	Training Programme	
STABLE	Required	1	Training Programme	
ED NCHD curriculum at each site (80% attendance)	Required	1	Training Programme	
HMIMMS (On site)	Desirable	1	Training Programme	
NRP Neonatal Resuscitation Course	Desirable	1	Training Programme	
CHI ED Procedural Sedation Course	Required	1	Training Programme	
Study days	Desirable	1	Training Programme	Teaching Attendance
Attendance at PEM education sessions (80% attendance)	Required	1	Training Programme	Teaching Attendance
In-house activities (Note: when % are written, the 1 in minimal requirement is equivalent to the % required)				Attendance at Hospital Based Learning
CHI Grand Rounds (75% attendance)	Required	1	Year of Training	
Journal Clubs (75% attendance)	Required	1	Year of Training	
Radiology conferences (75% attendance)	Required	1	Year of Training	
MDT: ED Clinical Operations Group or equivalent	Desirable	1	Year of Training	
ED Simulation Training (75% attendance)	Required	1	Training Programme	
ED Induction	Required	1	Training Programme	
Formal Teaching Activity				Additional Professional Experience
Lecture (fellow to give 1 journal club, 1 didactic, 1 sim, 1 workshop)	Required	8	Training Programme	
Research	Desirable	1	Training Programme	Research Activity

Curriculum Requirement	Required/Desirable	Minimum Requirement	Reporting Period	Form Name
Audit activities	Required	1	Training Programme	Audit and QI
Publications	Desirable	1	Training Programme	Additional Professional Experience
Conference Presentations	Desirable	1	Training Programme	Additional Professional Experience
Attendance at National/International meetings (IPEM, PERM, IPA or IAEM)	Required	1	Training Programme	Additional Professional Experience
Section 4 - Assessments				
Quarterly Assessments	Required	8	Training Programme	End of Post/Quarterly Assessment
End-of-Post/End-of-Year Assessments	Required	2	Training Programme	End of Year Assessment

Appendix – RCPI Taught Programme

Design of the Taught Programme

The new RCPI Taught Programme will consist of a series of modular elements spread across the years of training. Delivery will be a combination of self-paced online material, live virtual tutorials, and in-person workshops, all accessible in one area on the RCPI's virtual learning environment (VLE), RCPI Brightspace.

The live virtual tutorials will be delivered by Tutors related to Paediatrics and they will use specialty-specific examples throughout each tutorial.

International Trainees will be assigned to a tutorial group and will remain in the same tutorial group with the HST Trainees.

Each training year will include two scheduled virtual tutorials lasting 2 hours. Allocated dates will be provided before the start of a rotation. Trainees must plan the time to complete their requirements and must be supported with the allocation of study leave or appropriate rostering.

Trainees will be assigned self-paced online learning material per quarter. This self-paced content will be delivered via RCPI Brightspace.

No standalone courses

A continuous programme across the years of HST

Cohesive teaching faculty

Planned timing of learning

Specialty specific cases

Tutorial groups

Applicable and relevant learning

The RCPI Taught Programme Content

Effective Communication

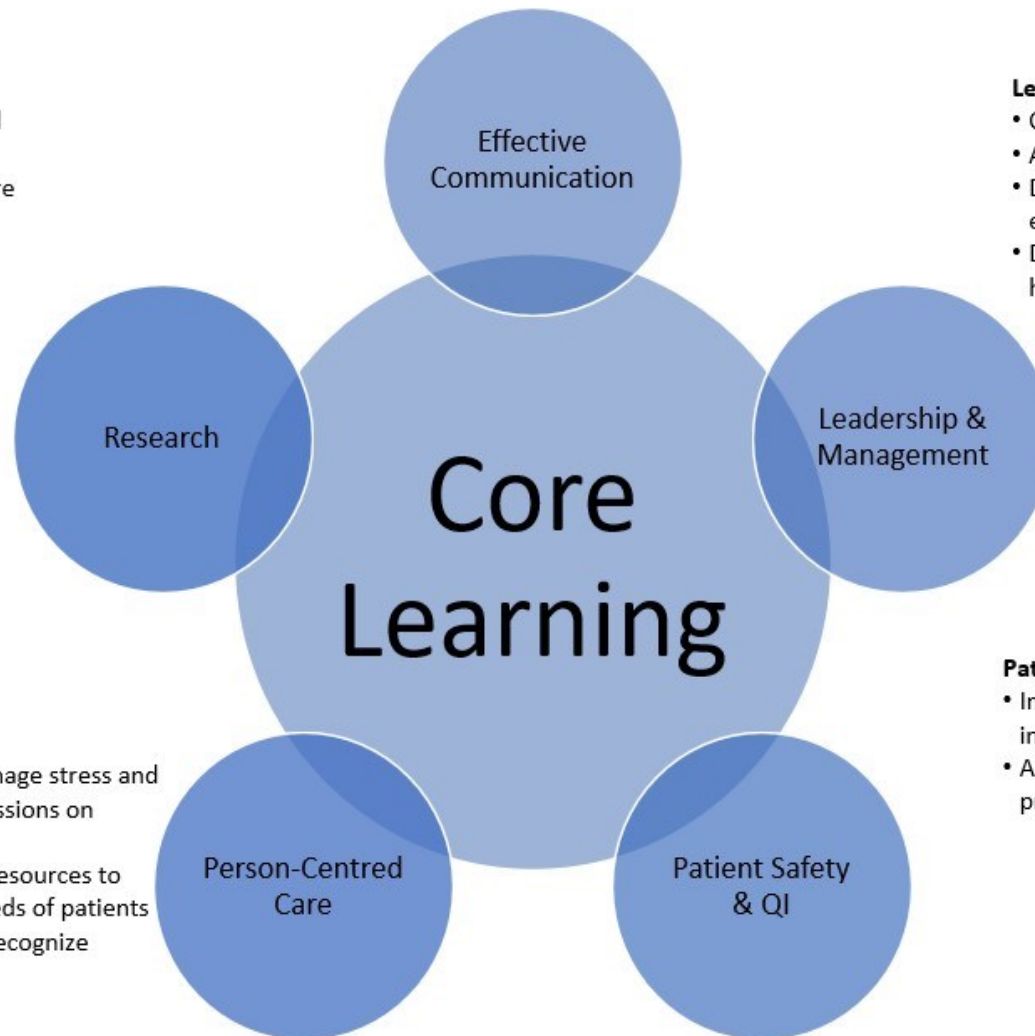

- Critically evaluate communication theory and analyse efficacy in a clinical environment
- Create more effective communications culture within a team

Research

- Apply research and data skills
- Utilise data for research, evaluation and improvement
- Understand methods and responsible data management processes

Person-Centred Care

- Illustrate person-centred care principles, manage stress and prevent burnout, engage the patient in discussions on outcomes and experience
- Explore ethical and legal dilemmas, identify resources to support healthcare staff, manage diverse needs of patients
- Develop skills in advance care planning and recognize legislative impact on patients' decisions

Leadership & Management

- Critically analyse different styles of leadership
- Assess equitable outcomes for patients
- Deliver effective and safe clinical care within a safe environment
- Develop a psychologically safe team and understand how to support and prioritise teamwork

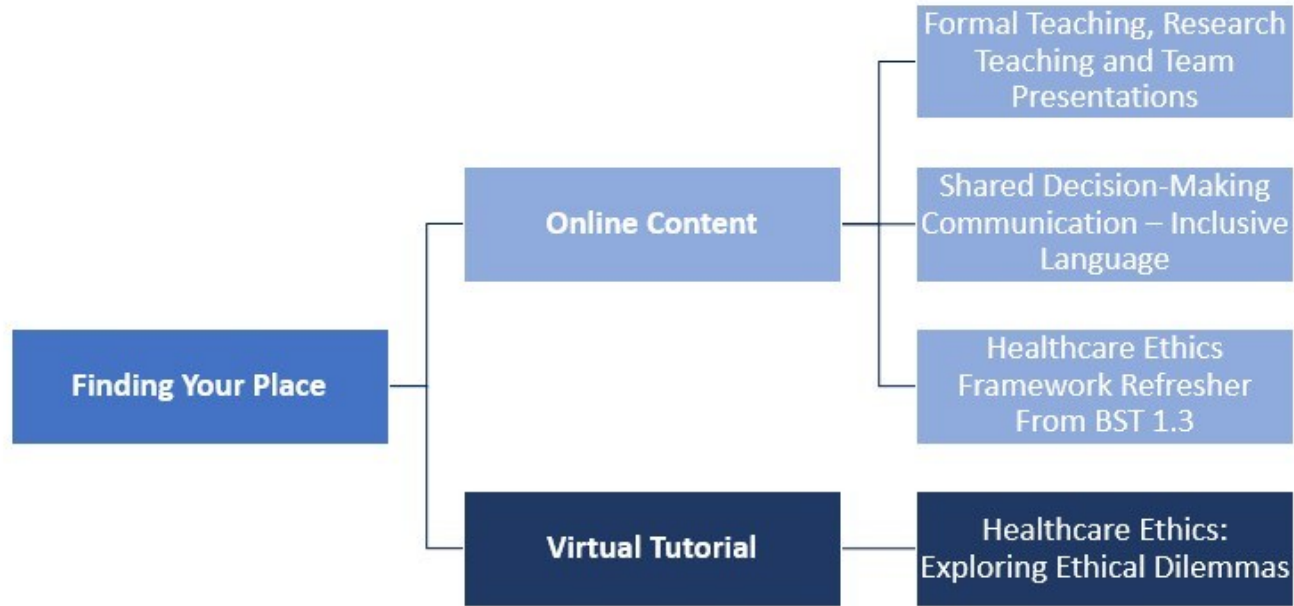

Patient Safety & QI

- Integrate patient safety principles and approaches into healthcare practice
- Apply quality improvement tools and methods in practice

The RCPI Taught Programme by Quarter – Year 1
